

DR. Juliet Skinner, MRCOG, MRCPI.

2002-Present Medical Director, Barbados Fertility Centre

In 2002 I worked with Sims Clinic Dublin to develop the first IVF unit in Barbados. This was originally named Sims International Clinic and initially functioned as a satellite unit from the clinic in Dublin. I was responsible in developing the service from the beginning. This project has been ongoing and has undergone substantial expansion to the current Barbados Fertility Centre.

1999-Present Consultant Obstetrician and Gynaecologist

On returning to Barbados in late 1999 I established an obstetrics and gynecology practice. Since the development of the Barbados Fertility Centre this practice has been weaned down to balance the increasing demands of the IVF centre.
